

### Series E/PSB 10000 4U

The EPS's power supplies of the »E/PSB 10000 4U« series are so-called bidirectional devices, incorporating the function of a laboratory power supply (source) and an electronic load (sink) into one unit. They allow for easy setup of applications according to the source-sink principle with a minimum of required hardware and cabling. Switching between source and sink operation is seamless and without delay at zero point.

The sink feature furthermore includes an energy recovery function, similar to the one in series EPS/ELR 10000, which inverts the consumed DC energy with an efficiency of up to 96,5% and feeds it back into the local mains. DC voltages between 0-10V and 0-2000V, output currents between 0-40A and 0-1000A and output power ratings up to 30kW are available.

Apart from basic functions of power supplies, set point curves can be generated by the integrated function generator (sine, rectangular, triangular and other curve types). Arbitrary generator curves (99 points) can be saved to and loaded from USB stick. Some of the functions even offer to dynamically switch between source and sink operation mode by setting up positive (for the source) or negative (for the sink) current set values. The integrated functions include a battery test mode, an arbitrary generator and a vehicle start-up curve (DIN 40839). As the internal resistance is adjustable, the functioning of batteries, fuel cells or photovoltaic modules can also be reproduced. The following simulations are available: Battery (SOC and DoD), LV123/LV124LV148, PV (Solar array simulator EN50530+Sandia, determination of the efficiency via the optional software EPS/MC) and FC. The power supply E/PSB can also be used to return the energy in test processes, for example on a drive test rig, to the supply source. Machine standard according to EN60204-1. In addition, the devices offer as standard the possibility for parallel connection in so-called Share bus operation for constant current sharing, plus a true master-slave connection with totaling of all actual values is also provided as standard. Using this operating mode, up to 64 devices can be connected to form a system that offers an increased total output of up to1920 kW.

All models are controlled by microprocessors for fast and exact measurement and display of actual values. Set values and actual values, status and notifications are clearly represented on the intuitive 5" TFT touch panel, too.

For remote control the devices are provided as standard with Ethernet, USB port on the back as well as a galvanically isolated analog interface. Via optional plug-in interface modules, other digital interfaces such as Profibus, ProfiNet, Modbus TCP, CAN, CANopen, EtherCAT or RS232 can be added. These enable the devices to be connected to standard industrial buses simply by replacing or adding a small module. The configuration, if necessary at all, is simple. Thus the power supplies may, for example, be operated with other power supplies or even other types of equipment or controlled by a PC or PLC, all using the digital interfaces.

Further options are a grid and system protection, a water cooling system, preconfigured cabinet systems, extended warranty and calibration with protocol. The bidirectional devices are CE, UL as well as CSA certified.

Energy efficiency: Energy recovery, high efficiency, temperature controlled fans, water cooling system

Scope of delivery: Power Supply Unit Test report AC connector plug (clamp type) Set for AC cable strain relief Set DC terminal cover 2x Plug for Remote Sense Terminal cover sense

# Series E/PSB 10000 4U

Isolation Output/Enclosure	neg.+-1500V DC, pos.+2000V DC max.
Protection class	1
Parallel operation	Master-Slave
Current sharing	Standard (BNC)
Cooling	Fan
Operation temperature	0-50°C
Storage temperature	-2070°C
Humidity	<=80% n.c
Attitude	<=2000m
Design	19 inch
Standards	EN/UL/CSA-C22.2 61010-1,EN55011 cl.B,EN61326-1
Power fail	Standard
Alarmmanagement	Standard
Function generator	+arbitrary
Output Preset	Standard
Memory	5 Profile
Capacity	75µF

#### **Interfaces**

Analog Isolation	Standard, max.1500VDC
Accuracy Interface	0-10V <= 0.2%; 0-5V <=0.4%
USB Interface	Standard
RS232 Interface	Option EPS/IF-AB R
CAN Interface	Opt.EPS/IF-AB-CAN/O
Profibus	Option EPS/IF-AB PB
Ethernet Interface	Standard, Opt.IF-ETH1P/2P
Ethercat Interface	Option EPS/IF-AB-ECT
Software	Standard EPS/PC, Option EPS/MC

#### **Technical data**

Output Voltage	0-1500 VDC
Output Current	0-60 A
Output Power	30000 W
Input Current	< 56A
Efficiency	<=96,5%
Ripple U	2400mVpp(20Mhz)/400mVrms(300k)
Ripple I	<=26mArms (E-Last/load)
Resistance Adjustment Range 1	0,8-1500 Ohm
Resistance Resolution Range 1	0,1 Ohm
Remote Sensing	Standard
Dimensions in mm (WxHxD)	483 x 177 x 668
Weight	~50 kg
Order code	200308

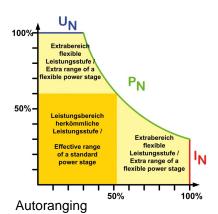

#### **Options**

Option 1	Calibration with protocoll EPS/I10000 CAL
Option 2	Extended Warranty 2 / 3 / 5 years EPS/G2/3/5
Option 6	Battery simulation Licence EPS/BS-LI / LEAD
